SCREENER

Side Conveyor	32"
Active Warnings	None
Operational	Yes
Comments	The serial number plate is missing from the machine, preventing us from verifying the serial number of the unit. The screener is in overall good condition. The tracks, rollers, sprockets, and idlers are in good condition. The belts and rollers are good as well. The body of the unit is in fair condition showing little wear and tear. The engine starts and runs smoothly and there are no visible signs of leaks or issues. The battery box is fairly dirty but the connection is still good and there were no issues in operating the equipment. The hydraulic engine, cylinders, and hoses show no signs of leakage.
